

Comprehensive Characterization and Transcriptomic Profiling of the GH3 Gene Family in *Brassica rapa* and Their Involvement in Auxin-Mediated Growth and Stress Responses

Supplementary Figures

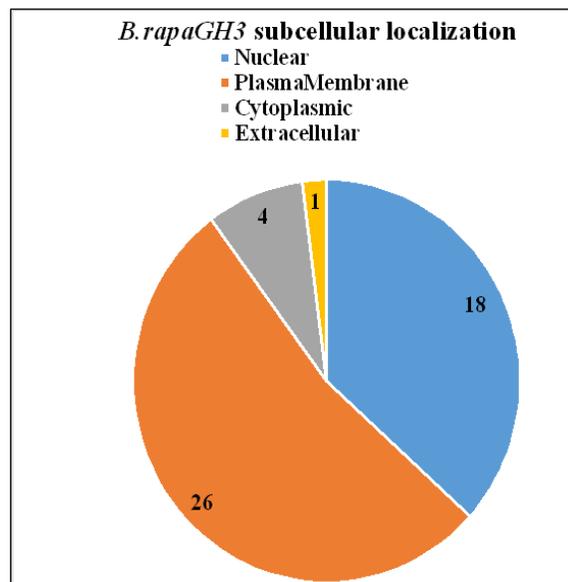

Fig S1: Subcellular localization of *B.rapa*GH3

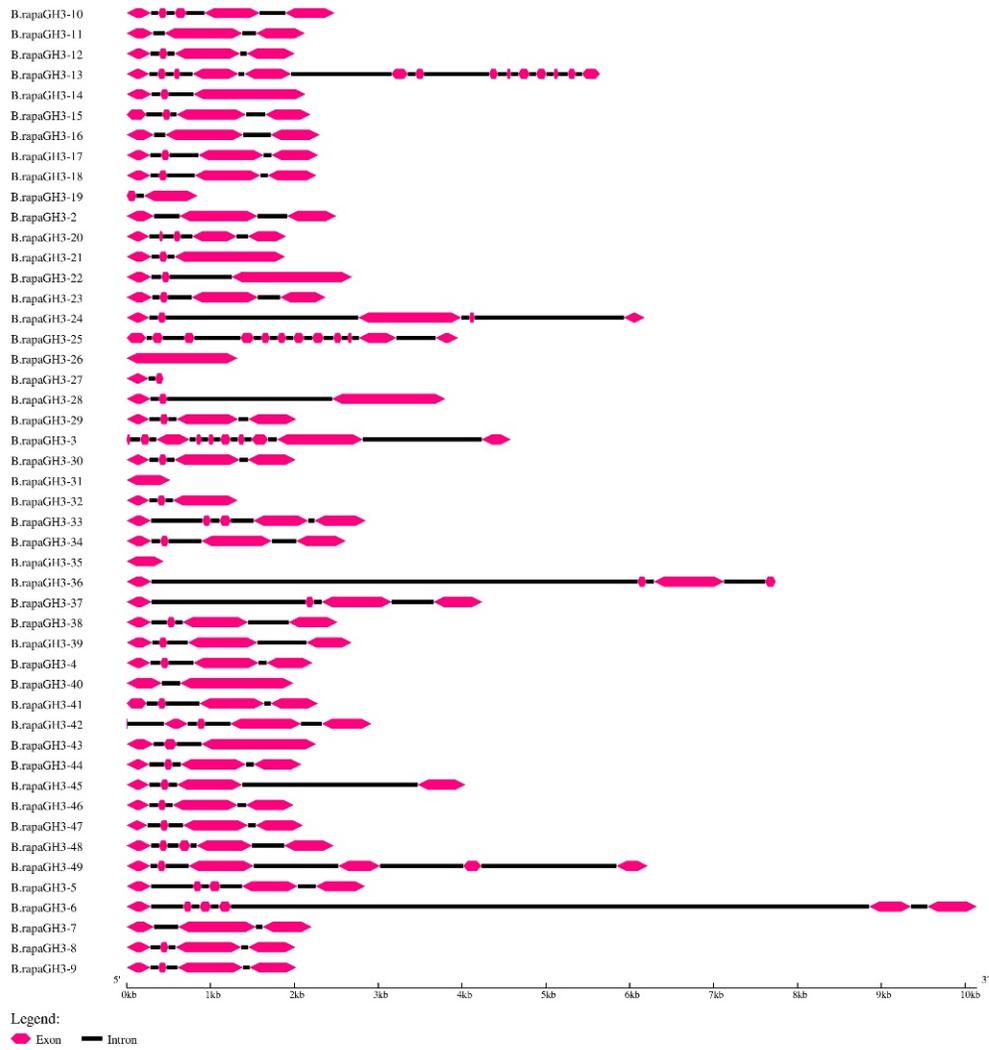

Fig S2: GSDS online software predicted the gene structure of *B.rapaGH3*, indicating the intron and exon.

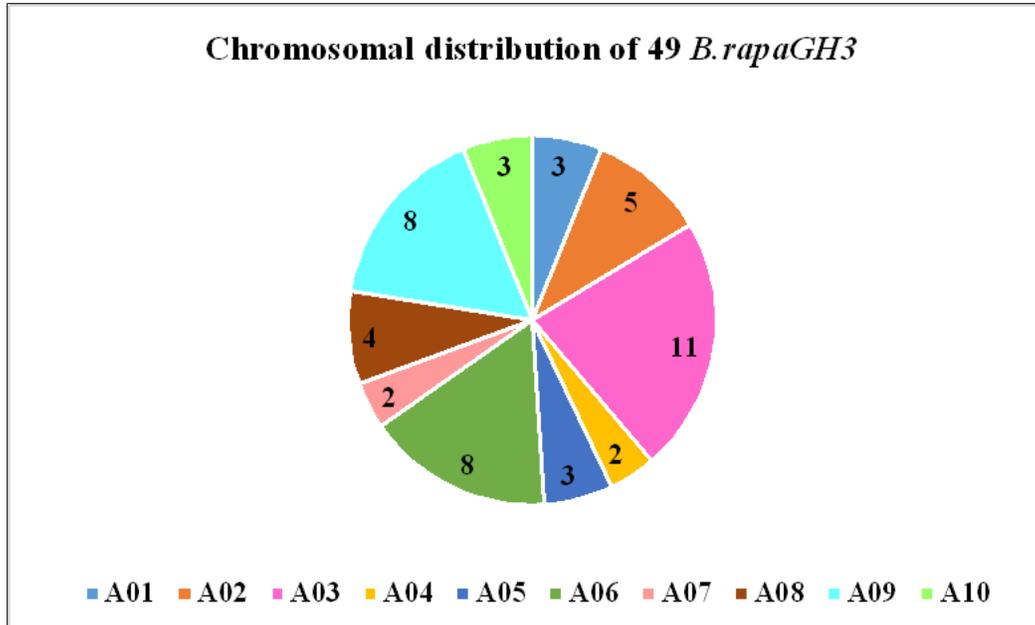

Fig S3: *B.rapaGH3* chromosomal distribution

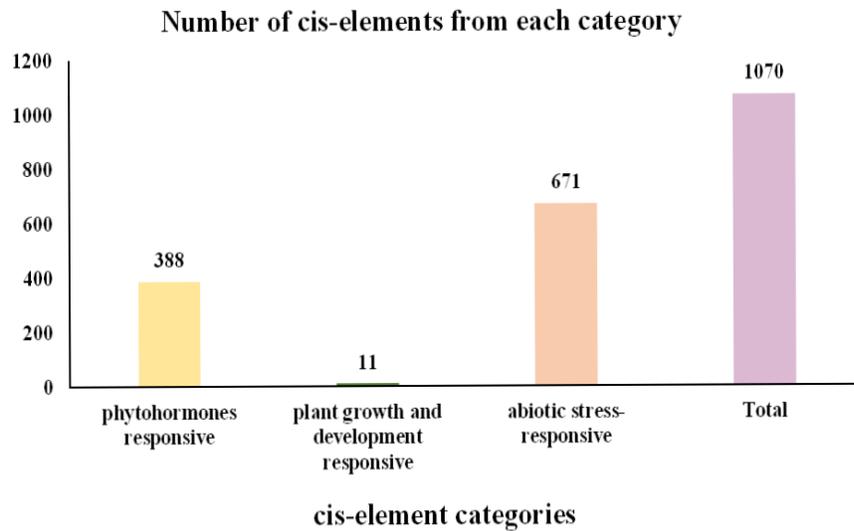

Fig S4: The bar graph shows the total identified elements and the number of each element in a specific color.
